

FUNCTIONAL CHARTS

SIZE 63 mm

Material thickness compensation values and relative clamping force performance are available upon request: please get in touch with our sales representatives.

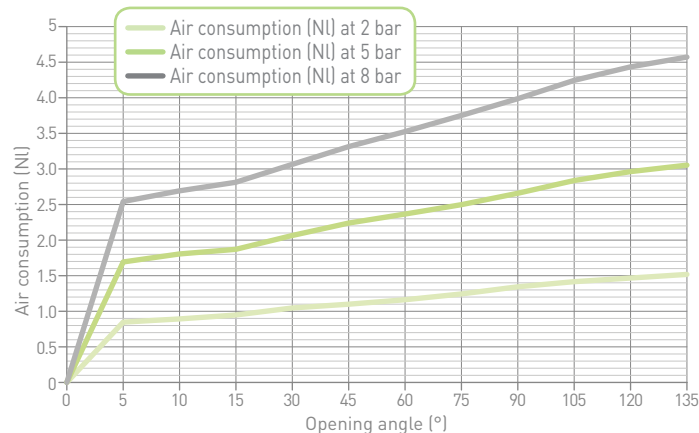

Calculation tool available upon demand

Please consult our technical representatives

Subject to change without notice

Air consumption

REV. 00 - 17/06/2015

Clamping moment (at 5 bar)

390 N m

Holding moment

1,500 N m

The above data are meant for correct working conditions of the clamp – with the same performance level during its life time.

For applications which exceed the above data, please contact our sales representatives.

Tooling weight chart

5 bar operating pressure – 135° opening angle

REV. 00 - 17/06/2015
