Non-rotating Metal Stem Tip

A non rotating stem tip is typically used in high cycle applications to extend the service life of the valve. Its purpose is to prevent galling of the valve seat in contact with the non-rotating stem, which is driven straight into it without rotating.

- Tee bar easy manoeuvrability with minimum effort
- PTFE packing standard, optional graphoil
- Stainless steel construction as standard, optional: carbon steel LF2, Duplex, Super Duplex, Monel 400, Hastelloy C276, Inconel 625, Titanium, Incolloy 825
- Colour coded functional identification
- Externally adjustable gland
- Variety of end connections
- Dust cap to prevent contaminations on the operating thread

Anti-Tamper

Materials Table

1	TEE BAR	AISI 304
2	FIXING	AISI 303
3	CAP	HYTREL
4	GLAND NUT	AISI 316L
5	LOCK NUT	AISI 316L
6	BONNET	AISI 316L
7	RING	AISI 316L
8	METAL SEAL	AISI 316L
9	STEM PACKING	PTFE / GRAPHOIL
10	STEM	AISI 316L
11	PIN	AISI 304
12	NON-ROTATING STEM	AISI 316L

Features

- Rolled stem threads prevent galling. Stem threads are completely isolated from the process.
- Stem packing with graphite rings for bubble-tight seal.
- Bolted bonnet strength and reliability.
- Stem tip construction: non-rotating self-centering.
- Flange gasket seal ensures a bubble-tight between body and bonnet.
- Backseat design provides secondary stem sealing and prevents stem blowout.
- Adjustable gland flange allows easy access to the packing gland, and packing adjustment for an effective stem seal.
- Robust handwheel painted
- Firesafe to BS 6755 PART. 2
- Pressure rating up to 6.000 psi (413 bar)
- Temperature rating: (GRAPHOIL)
-54°C / +510°C (-65°F / +950°F)

MATERIALS TABLE		
1	HANDWHEEL	PAINTED CARBON S.
2	UPPER STEM	AISI 316L

Ordering Information - Monoflanges

Sami Instruments manufactures monoflanges to replace multivalve assemblies with single, flange-mounted manifold configurations. The main advantages over a typical system include compactness and weight savings, which can reduce stress from loading and vibration; fewer potential leak points and reduced installation and maintenance.

Model	Type	Configuration	Nominal Size	Rating	Flange Finish	Outlet	Packing Isolate Vent	Material	Options
MO	H	1	A	1	A	2	P	A	A

Model

Applications

This product range represents a true technical and economical innovation in the management of the instrumentation analysis. Differently from the old system composed by big size block valves, safety and on-off valves, draining and sampling, these monoflanges allow to reduce costs and spaces. The monoflanges can be realized in traditional AISI 316 L as standard or exotic materials when required. They have compact dimensions with consequent reduction of assembling costs.

- Stainless steel construction as standard, optional: carbon steel LF2, Duplex, Super Duplex, Monel 400, Hastelloy C276, Inconel 625, Titanium, Incolloy 825
- Temperature rating GRAPHOIL packing from -54°C to $+510^{\circ}\text{C}$ (-65°F / $+950^{\circ}\text{F}$)
