

Instrumentation Products

Gauge Valves and Pressure Gauge Accessories

Introduction

Introduction

The AS-Schneider Group with its headquarters in Germany is one of the World's Leading Manufacturers of Instrumentation Valves and Manifolds. AS-Schneider offers a large variety of Gauge Valves, Gauge Cocks, Syphons and Supports as well as Gauge Protectors, Gauge Snubbers and Accessories needed for the instrumentation installations globally.

Selection can be made from a comprehensive range of bodies with a variety of connections and material options, optimising installation and access opportunities. Many of the valves shown in this catalogue are available from stock or within a short period of time. The dimensions shown in this catalogue apply to standard types. If you need the dimensions for your individual type please contact the factory.

Continuous product development may from time to time necessitate changes in the details contained in this catalogue. AS-Schneider reserves the right to make such changes at their discretion and without prior notice.

All dimensions shown in this catalogue are approximate and subject to change.

^{*} Brass: Body made of either CW 614N or CW 617N

Standard Features

Every standard valve is factory tested hydrostatically to a requirement of no visible leakage.

Brass, carbon steel or stainless steel valve bodies are forged, except gauge snubbers in carbon steel and stainless steel. All other components are made from barstock material – syphons also made from pipe.

Certification acc. to EN 10204 2.1, 2.2, 3.1 and 3.2!

Valves for sour gas service are available in accordance with NACE MR0175/MR0103 and ISO 15156. To order, contact the factory. Some of our valves are supplied according to NACE as standard.

Surface treatment of carbon steel valves and accessories: Phosphatized, Galvanized surface optional.

Optional Features

- Valves and Accessories cleaned and lubricated for Oxygen Service Suffix used F0 and F5.
- · Valves according to DVGW.
- Valves for Fugitive Emission Applications.

If you don't find your options in this catalogue, please contact the factory.

Continuous product development may from time to time necessitate changes in the details contained in this catalogue. AS-Schneider reserves the right to make such changes at their discretion and without prior notification. All dimensions shown in this catalogue are approximate and subject to change.

General Features AS-Schneider

^{**} Quadruple certified means 316 / 316L / 1.4401 / 1.4404

 $S = Standard \mid O = Optional \mid A = Alternative (see Catalogue AS-2601)$

Connections

AS-Schneider is manufacturing a lot of different connections and connection combinations. In this catalogue we are showing the most popular types. On this page you will find the standard connections in detail.

Parallel Pipe Threads

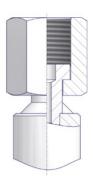

BSP Parallel Male Threads acc. to EN 837-1 (e.g. G 1/2)

Adjusting Nut acc. to DIN 16283 (LH \times RH)

Swivel Nut (Welded Nipple Design) acc. to DIN 16284

Tube Fittings

Single Ferrule Tube Fittings acc. to EN ISO 8434-1 Size S

Tapered Pipe Threads

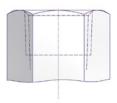

NPT Male Threads acc. to ASME B 1.20.1

BSP Tapered Thread acc. to ISO 7/1 (e.g. R 1/2)

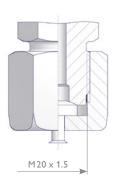

NPT Female Threads acc. to ASME B 1.20.1

BSP Tapered Thread acc. to ISO 7/1 (e.g. Rc 1/2)

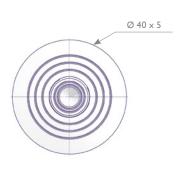

Test Connections

 $M\,20\,x\,1.5$ Male Thread with sealing cap acc. to DIN 16271 or with protective cap acc. to DIN 16272 and DIN 16263 (protective cap not shown)

Test Flange Ø 40 x 5

Test Flange 60 x 25 x 10

Gauge Cocks I Features and Benefits

Product Description

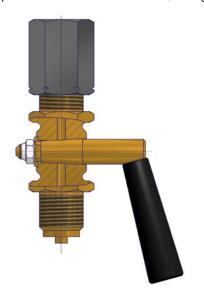

AS-Schneider Gauge Cocks are basically designed, manufactured and tested according to DIN 16261, DIN 16262 and DIN 16263. According to these standards the cocks are applicable for a max. allowable (Working) Pressure (PS) of 6 - 16 bar and a max. allowable Temperature (TS) of 50°C for liquids, gas or vapors. Originally our Gauge Cocks were designed for a max. allowable (Working) Pressure (PS) of 25 bar for the G 1/2 models. We kept this pressure class for these kind of gauge cocks, as you can see in the table on Page 16-18.

Standard Features

- Forged Body
- Plastic Handle

Pressure Test:

A seat test is performed at 1.5 times the max. allowable (working) pressure acc. to EN 12266-1 - P12, Leakage rate A.

Optional Features

• Sealing Washers according to EN 837-1, see Page 34.

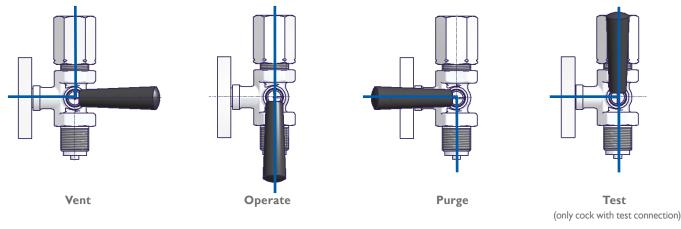

Components	Brass	Stainless Steel
	Material / Material N	0.
Body	Brass	1.4571
Washer		1.4301
Hexagon Nut	Unalloyed Steel	A2
Union Nut	Brass

Packing	PTFE	
Adjusting Nut	Unalloyed Steel	Stainless Steel
Swivel Nut	Brass	
Test Flange	DI d\$\$	1.4571
Handle	Pla	stic

Union Nut, Gland and Packing only applicable for Gauge Cocks with Gland.

Operating Positions

Operating Positions are marked on top of the plug. There are max. 4 positions available: Vent, Operate, Purge and Test. The Test Option is only available for Gauge Cocks with Test Connections. The other options are basically for all cocks available except for the Gauge Cocks with Gland without Vent / Test Connection, our types N003.09.000 and N003.10.000. These 2 models just have 2 Operating Positions: Operate or Closed (no marking on the plug required).

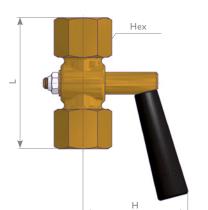

Before using the Operating Positions Vent or Purge you must be aware that system fluids are released to atmosphere. These fluids can be poisonous, irritating, hot or cold. This is also valid for the Test Position if the Test Pressure Gauge is not installed, respectively for Gauge Cocks without Test Connection because these Gauge Cocks are provided as a standard with a bleed outlet Ø 3.5 mm instead of the Test Connection. Operation and maintenance may only be done by experienced staff, which is familiar with the secure handling of the used media.

18 Gauge Cocks AS-Schneider

Gauge Protectors | Features and Benefits

Product Description

AS-Schneider Gauge Protectors are used to protect pressure-sensing instruments against damage, loss of accuracy, and/or rupture in the event of excessive system pressure. The piston assembly works against an adjustable spring. The piston assembly contains a sealing mechanism to isolate system pressure from the instrument.

The Inlet to Outlet seal is an O-Ring, the sealing to atmosphere is realized by either another O-Ring (system pressures of more than 2 bar) or a diaphragm (for system pressures 0.4 up to 2.5 bar). As system pressure overcomes the force of the spring, the piston moves, causing the sealing system to close. The outlet side is now isolated from increasing system pressure and the instrument is protected. As system pressure drops to the reopening pressure (25% below the closing pressure), the valve opens again.

Standard Features

- Forged Body
- · Piston Seals:
- FKM (FPM by ISO)
- Diaphragm in NBR for the DVGW approved type
- Max. allowable (Working) Pessure (PS): 600 bar
- Max. Inlet Pressure: 1,000 bar (except Brass Type: 600 bar)
- Max. allowable Temperature (TS) 80°C, resp. 60°C for our DVGW approved types S005.50.001.00DV / 201.00DV

The Gauge Protectors are as a standard available for sour gas service in accordance with NACE MR0175/MR0103 and ISO 15156 except the Brass Type.

Pressure Test:

A shell test and a seat test are performed at 1.5 times the max. allowable (working) pressure acc. to EN 12266-1 - P10, P11 and P12. The closing pressure is normally adjusted to the average value of the relevant adjusting range – For example adjusting range 2-6 bar = 4 bar closing pressure.

Optional Features

DVGW approved Gauge Protectors:

AS-Schneider is offering Gauge Protectors which have been tested and approved by DVGW. The test basis is DVGW VP 308. The valves are applicable for all kinds of gas in accordance with DVGW-list number G 260.

Pressure-Temperature Rating:

- Max. 400 bar @ -20°C up to +60 / +80°C
- DVGW-Approval-No.: DG-4515BP0208
- Part No. Suffix ...00DV for DVGW types

Oxygen Service:

AS-Schneider offers an option cleaned and lubricated for Oxygen Service – Suffix F0:

- Max. allowable (Working) Pressure (PS): 400 bar
- Max. allowable (Working) Temperature (TS): 60°C
- A choice of O-Ring materials is available.

Certification:

Inspection certificate 3.1 acc. to EN 10 204 for valve body material and pressure test available on request.

Gauge Snubbers | Features and Benefits

Product Description

AS-Schneider Gauge Snubbers are used to improve the output or readability of the instrument, and to reduce the effect of pressure surges on the instrument.

They also limit the external discharge of the pressure medium, in the event a discontinuity should occur on the instrument side of the snubber. Closing the valve increases the dampening action.

Standard Features

- Forged Body in Brass, all other materials in Barstock Material
- Max. allowable (Working) Pressure (PS): 400 bar
- Max. allowable Temperature (TS): 120°C
- The Gauge Snubbers are available for sour gas service in accordance with NACE MR0175/MR0103 and ISO 15156, see table on Page 23.

Optional Features

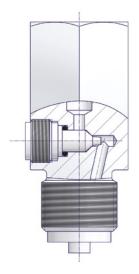

Oxygen Service:

AS-Schneider offers an option with for Oxygen Service – Suffix F0 (PN 250) or F5 (PN400):

- Max. allowable (Working) Pessure (PS): 400 bar
- Max. allowable (Working) Pessure (TS): 60°C
- A choice of O-Ring materials is available.

Certification:

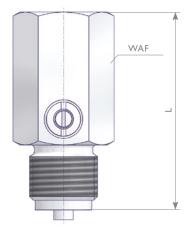

Inspection certificate 3.1 acc. to EN 10 204 for valve body material and pressure test available on request.

Supports for Valves and Measuring Instruments

AS-Schneider is providing a range of supports for wall, rack or 2" pipe mounting to mount Gauge Valves according to DIN 16270-16272 Type B or Adapters relating to DIN 16281 (see Page 33).

Standard extension L = 100 mm. Type H also available with 60 and 160 mm extension

The below mentioned part numbers for 2" pipe mounting are supplied as mounting kits including 'U' bolt, washers and hexagon nuts.

Bolts for wall mounting are not included in the scope of supply.

Supports DIN 16281 Type H For wall mounting

L (mm)	Design	Material	Installation Method	Part Number
60	DIN 16281 Type H			S006.12.105

Mounting Kit for 2" pipe mounting in stainless steel.

Syphons, Elbows and Straight Pipes

Product Description

AS-Schneider Gauge Syphons are used to protect the pressure gauge from the effect of hot pressure media such as steam and also to reduce the effect of rapid pressure surges. The syphon allows condensate to form and be collected inside the syphon, preventing the hot media (hot vapors, not just steam) from coming in direct contact with the pressure instrument. Also used as freeze protector when used with proper fill fluids.

AS-Schneider is providing 3 different syphon designs. The Coil Syphon is normally used for vertical installations and the U Type Syphon for horizontal installations. The third design is a compact Gauge Syphon which can be used instead of the Coil Syphon. In addition, AS-Schneider is providing pipe connectors where a syphon is not required, such as Elbows and Straight Pipes.

The standard syphons are designed, manufactured and tested according to DIN 16282. The standard pipe dimension is Ø 20 x 2.6 mm. 1/2" pipe (Ø 21.3 mm) dimensions are also available. AS-Schneider is also providing so-called Commercial Style Syphons. These types have a standard pipe dimension of Ø 21.3 x 3.2 mm – using threaded pipe connections instead of weld fittings. The Compact Gauge Syphon is available as standard type and also as integral snubber type.

Standard Features

- The standard DIN 16282 U Type Syphon is bended to the left side, optional also to the right side (see also Page 27).
- Commercial Style U Type Syphons are bended in a single-plane
- Range of application: For liquids, gas, steam and vapors

Surface treatment of Carbon Steel Types:

- DIN 16282 Style: Phosphatized
- · Commercial Style: Oiled, optional phosphatized

Certification:

Inspection certificate 3.1 acc. to EN 10 204 for pipe material available on request.

Optional Features

The standard AS-Schneider circular shaped syphons are Coil Syphons. Should you require Pigtail Syphons please contact the factory.

Coil Syphon

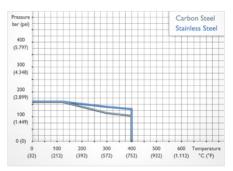

Pigtail Syphon

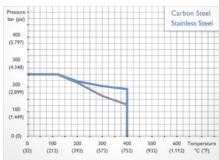

Other Materials, Pressure-Temperature Ratings and Connections on request.
