VALVOLE A GHIGLIOTTINA

KNIFE GATE VALVES

GENERAL CATALOGUE

VALVOLE A GHIGLIOTTINA

KNIFE GATE

Da oltre 40 anni Ceap Srl nel suo stabilimento di Schio (Vicenza) produce valvole a ghigliottina a passaggio totale con funzione on-off e di regolazione.

Queste le tipologie proposte:

Valvole Monoblocco

Valvole a Lama Passante

Valvole di regolazione a 30° e con Passaggio Romboidale

Deviatori a 3 e 4 vie

I tipi di comando:

Volantino con asta non saliente

Pneumatico con cilindri a norma ISO 15552 e 21287 a doppio effetto con la possibilità di parzializzare l'apertura mediante posizionario 3-15 Psi o 4-20 mA o meccanicamente con dadi limitatori

Motorizzato a vite non saliente

Leva

Le nostre valvole in ghisa, acciaio inossidabile o bronzo sono adatte a intercettare fluidi, fanghi o polveri e trovano impiego in svariati settori tra cui trattamento acque, settore ambientale, industria della carta, industria chimica, trasporto polveri e granulato, biomassa, industria alimentare.

Un prodotto made in Italy, la flessibilità che ci permette di proporre versioni personalizzate sulla base delle necessità specifiche dei nostri clienti e la possibilità di fornire anche piccoli lotti sono i nostri punti di forza.

Our Company has been producing full-port knife gate valves with on/off and adjustment function for over 40 years.

Our premises are located in Schio, in the province of Vicenza and we specialize in:

Monoblock knife gate valves

Through conduit knife gate valves

30° gate valves and rhomboidal passage valves

3- and 4-way deviators

The following controls are available:

Handwheel with non-rising stem

Pneumatic control with double effect cylinder complying with ISO 15552 and 21287 with the possibility to partially open the valve either by using a 3-15 Psi or 4-20 mA positioner, or mechanically by means of limiting nuts

Motorised control with non-rising stem

Lever

Our valves are suited for intercepting fluids, sludge and dusts. They are made in cast iron, stainless steel and bronze to be used in a wide variety of fields, such as in water treatment, environmental sector, paper industry, chemical industry, powder and granulate transport, biomass and food industry.

All products are made in Italy and our strength is flexibility. Not only we provide the most demanding customer with tailor-made products, but we are also willing to supply smaller batches of our articles.

**VALVOLA MONOBLOCCO UNIDIREZIONALE
CON COMANDO MANUALE**

7	Baderne / Packings	Treccia teflonata, grafitata, cotonata / Teflon, graphited or cotton braid
8	Colonne / Columns	Ferro zincato, Inox / Galvanized iron, Stainless Steel
9	Piastra supporto / Support Plate	Ferro verniciato, Ferro zincato, Inox / Iron painted, Iron galvanized, Stainless Steel
10	Comando / Control	Volantino in Ferro verniciato / Iron painted handwheel
	OR / OR	NBR, EPDM, FPM, PTFE (se richiesto) / NBR, EPDM, FPM, PTFE (on demand)
Passaggio / Passage		
	Tenuta verso esterno / Seal towards the outside	100%
	Tenuta monte/valle / Upstream/downstream seal	100% se con O-RING / with O-RING
	Foratura Flange / Flange drilling	UNI EN 1092 -1 PN 10 (EX UNI2277 - PN10)
Disponibile anche versione pneumatica e motorizzata / Available also pneumatic and motorized control

ANELLO CEMENTATO

utilizzato per diminuire l'usura del foro di passaggio

TEMPERED RING

used to reduce usury on passage hole

ANELLO CON PASSAGGIO A V

utilizzato per la regolazione del flusso

RING WITH V PASSAGE

used to allow flow regulation

CONO CONVOGLIATORE

utilizzato per proteggere il corpo ed evitare che il prodotto ristagni

CONVEYER CONE

used to protect the body and avoid products penetrations

SISTEMA INSUFFLAZIONE

utilizzato per pulire il vano interno del corpo valvola

INSUFFLATION SYSTEM

used to clean body inside

ACCESSORI - ACCESSORIES

RIDUTTORE CONICO DI MANOVRA

Utilizzato nelle valvole di grosso diametro per facilitare l'apertura e la chiusura

CONIC BEVEL GEARBOX

Used with valves of large diameter to make easier opening and closing

DADI LIMITATORI

Utilizzati per parzializzare l'apertura e la chiusura della valvola

LIMITING NUTS

Used to opening and closing regulation

BIDIREZIONALITÀ CON GRANI BIDIRECTIONAL WITH PLUNGERS

BIDIREZIONALITÀ CON ANELLO BIDIRECTIONAL WITH RING

VALVOLA CON MOTORIZZAZIONE A RICHIESTA
VALVE WITH SPECIAL ELECTRIC ACTUATOR

VALVOLA CON ATTUATORE A SEMPLICE EFFETTO
VALVE WITH PNEUMATIC SINGLE ACTING SYSTEM

VERSIONI SPECIALI - SPECIAL VERSION

VALVOLA CON ATTUATORE OLEODINAMICO
VALVE WITH HYDRAULIC ACTUATOR

VALVOLA A LAME CONTRAPPOSTE CON ATTUATORE PNEUMATICO
DOUBLE GATE VALVE WITH PNEUMATIC ACTUATOR

PROLUNGA TIPO A:
CON CASTELLO DA FISSARE AL PIANO CALPESTIO
*KIND A VALVE EXTENSION: ACTUATOR MUST
BE FIXED ON THE FLOOR*

PROLUNGA TIPO B:
SOLO ASTA CENTRALE
*KIND B VALVE EXTENSION: ONLY THE
THREADED ROD IS PROLUNGATE*

PROLUNGA TIPO C:
CON CASTELLO COMPLETO
*KIND C VALVE EXTENSION: THE SUPPORT OF
ACTUATOR IS TOTALLY PROLUNGATE*

Siamo specializzati nel

TAGLIO AD ACQUA

Grazie al sistema di taglio a 5 Assi Waterjet
Specifico per **TUBI E LAMIERE DI GRANDI DIMENSIONI**

**LAVORAZIONI PULITE E PRECISE COME SOLO
IL TAGLIO WATERJET PUÒ GARANTIRE**

Grazie all'utilizzo della nostra OMAX 120X a Cinque Assi
e Doppio Ponte con banco di taglio di 3000 x 14000

Contattaci per maggiori informazioni

inossidabili

ma flessibili

**Tubi e raccorderia ricavati da lamiera,
in acciaio inossidabile, duplex,
super duplex, titanio e leghe speciali.**

Il nostro sistema produttivo, particolarmente flessibile nelle dimensioni non standard, permette la produzione di tubi a sezione tonda, quadra, rettangolare, adatta alla più vasta gamma di applicazioni.
